A constituent institution of MAHE, Manipal

International Conference on
Global Challenges in Health Care

Date : February 16 & 17 , 2018

*Venue: Dr. TMA Pai Auditorium, 3rd Floor
KMC , Manipal, India*

Perception of individuals' quality of life depends on quality of healthcare. Health care is facing many challenges globally. Advent of new technology revolutionized the delivery of health care. Changing demographics, rising cost of care, emergence of technology and its cost, filling the resource gaps, focus on quality, becoming customer-driven, challenges in public-private mix in health care, inequality of resources etc. are laying huge impact on health care. Growing complexity of health care arena is no longer manageable with current health care systems. Solutions for such challenges should be recognized so that effective health care delivery can be facilitated.

Aim

This Conference aims at exploring and addressing the Global Challenges in Health Care delivery system.

Sub Themes

- Challenges in bridging the gap between Academia and Clinical practice
- Unequal access, poor quality care and rising cost; A risen concern
- Challenges in health care delivery and creative solutions
- Digitalization in health care-a challenge for common-public
- Technology in health care - A forum for change through evidence based care
- Global Challenges in mother and child health - past, present and future
- A road map to nurse practitioner programme: Challenges and solution for Indian Health Care
- Dementia - A Global Challenge
